PROFESSIONAL SUMMARY

Software Engineer with a strong foundation in Computer Science fundamentals, C++ Programming, Data Structures and Algorithms, Object-Oriented Programming, and problem solving. Experienced in building scalable backend systems and RESTful APIs using ASP.NET Core, TypeScript, React, MySQL, and AWS. Passionate about developing production-ready software solutions and solving complex engineering problems through efficient, scalable, and maintainable code.

EDUCATION

Rajalakshmi Engineering College (Affiliated to Anna University)

2022 - 2026

Bachelor of Technology, Information Technology

Related Coursework: Data Structures and Algorithms, Problem Solving, Optimization, Software Development, OOPS, DBMS(Relational & NoSQL), Computer Networks, Operating System, Computer Architecture, Error Handling

PROFESSIONAL EXPERIENCE

LCS Controls Private Limited

April 2026 - Present

Software Engineer Intern

- Developed scalable distributed cloud applications and RESTful APIs using ASP.NET Core, C#, ADO.NET, and MySQL Stored Procedures for a multi-tenant POS kiosk system, integrating React + TypeScript frontend modules for menu, inventory, device, and order management.
- Integrated Amazon S3 for media storage and deployed the application on AWS using Elastic Beanstalk (backend), Amplify (frontend), RDS MySQL (database), and CloudFront, improving scalability, performance, and reliability.

PERSONAL PROJECTS

AI-based Educational Video Generation Platform

- Developed an AI-powered educational video generation platform using React.js, Node.js, Express.js, and MongoDB, automating content research, script creation, narration, visuals, and video generation.
- Built educator dashboards to manage video requests, track generation progress, and download HD videos, reducing content creation time from hours to minutes.

Quiz Web Application

- Developed a Christmas-themed Quiz Web Application using HTML, CSS, JavaScript, Node.js, Express.js, and MongoDB, featuring randomized questions, snowfall animations, festive UI, and Excel report export using XLSX.js.
- Implemented secure backend validation and authentication, preventing duplicate quiz attempts, managing participant data in MongoDB. Handling user access through a predefined credential-based authentication system.

Via Band

- Developed VIA Band, a wearable health monitoring system using ESP32 and multiple sensors to track vital signs and location in real time.
- Built a web-based monitoring platform with interactive health dashboards, alerts, emergency notifications, and a hospital locator for quick assistance.

TECHNICAL SKILLS

Programming Languages: C++, Java, JavaScript, SQL, C#

Frameworks & Technologies: ASP.NET Core, Node.js, React.js, TypeScript, HTML, CSS, Tailwind CSS

Databases: MySQL, MongoDB

Cloud Platforms: AWS (Elastic Beanstalk, RDS, S3, CloudFront, Amplify)

DevOps & Tools: Git, Linux, REST APIs

CERTIFICATION

HackerRank - Problem Solving (Intermediate)

ICT Academy - AWS Cloud Solutions Architect – Associate

PUBLICATION

Published a research paper titled “An Intelligent AI-Based Framework for Automated Educational Video Generation” in IEEE Xplore at ICESIC 2026.

Co-authors: Kishore M, Priyanka D

ACHIEVEMENTS

- Solved 800+ LeetCode problems, demonstrating strong proficiency in Data Structures, Algorithms, and problem solving.
- Second Place in INNOVISION 2K24 - A National Level Event held in Rajalakshmi Engineering College.
- Secured 3rd place in Code Mania, a coding competition at Trojans IT Symposium, Chennai Institute of Technology.
- Sri Sankarathanu Pillai Merit Award – Awarded for outstanding contributions to societal causes.
- Organized and coordinated events including Recharge '24 & '25, Design Summit '23 & '24, INNOVISION '24 & '25, Beginnovate '24, Christmas, Pongal and Women's Day Celebration contributing to their successful execution.
