PROFESSIONAL SUMMARY

Aspiring IT professional with a strong foundation in technology and a passion for continuous learning. Known for effective leadership, strategic thinking, problem solving, collaborative team management and strong understanding of Data Structure and Algorithms. Enthusiastic about exploring emerging technologies, adapting to industry advancements, and developing innovative solutions that address real-world challenges.

EDUCATION

Rajalakshmi Engineering College

2022 - 2026

Bachelor of Technology (Information Technology)

Related Coursework: Data Structures and Algorithms, OOPS, Web Development, Software Engineering , DBMS, Operating System

PROFESSIONAL EXPERIENCE

LCS Controls Private Limited

April 2026 - Present

Software Engineer Intern

- Developed and maintained backend services using ASP.NET Core, C#, and MySQL, designing RESTful APIs, stored procedures, and database operations for enterprise kiosk management applications.
 - Integrated AWS S3 cloud storage and implemented modules for user, device, category, item, and order management, enhancing application scalability, performance, and data reliability.
-

PERSONAL PROJECTS

AI-based Educational Video Generation Platform

- Developed an AI-powered educational video generation platform using React.js, Node.js, Express.js, and MongoDB, automating content research, script creation, narration, visuals, and video generation.
- Built educator dashboards to manage video requests, track generation progress, and download HD videos, reducing content creation time from hours to minutes.

Quiz Web Application

- Developed a Christmas-themed Quiz Web Application using HTML, CSS, JavaScript, Node.js, Express.js, and MongoDB, featuring randomized questions, snowfall animations, festive UI, and Excel report export using XLSX.js.
- Implemented secure backend validation and authentication, preventing duplicate quiz attempts, managing participant data in MongoDB. Handling user access through a predefined credential-based authentication system.

Via Band

- Developed VIA Band, a wearable health monitoring system using ESP32 and multiple sensors to track vital signs and location in real time.
 - Built a web-based monitoring platform with interactive health dashboards, alerts, emergency notifications, and a hospital locator for quick assistance.
-

TECHNICAL SKILLS

Programming Language: C++, Java, JavaScript, Dart,HTML, CSS

Technologies: React Js, Node Js, Git, OOPS, MongoDB, MySQL, ASP .Net Core, Flutter, MERN, UI/UX, Linux, Tailwind CSS, Bootstrap

Certification: HackerRank - Problem Solving,(Intermediate)

PUBLICATION

Published a research paper titled “An Intelligent AI-Based Framework for Automated Educational Video Generation” in IEEE Xplore at ICESIC 2026.

Co-authors: Kishore M, Priyanka D

ACHIEVEMENTS

- Sri Sankarathanu Pillai Merit Award – Awarded for outstanding contributions to societal causes
- Second Place in INNOVISION 2K24 - A National Level Event held in Rajalakshmi Engineering College
- Secured 3rd place in Code Mania, a coding competition at Trojans IT Symposium, Chennai Institute of Technology.
- Served as the Class Representative for all four years of my undergraduate program.
- Organized and coordinated events including Recharge '24 & '25, Design Summit '23 & '24, INNOVISION '24 & '25, Beginnovate '24, Christmas, Pongal and Women's Day Celebration contributing to their successful execution.
